

Assignment No.: 13

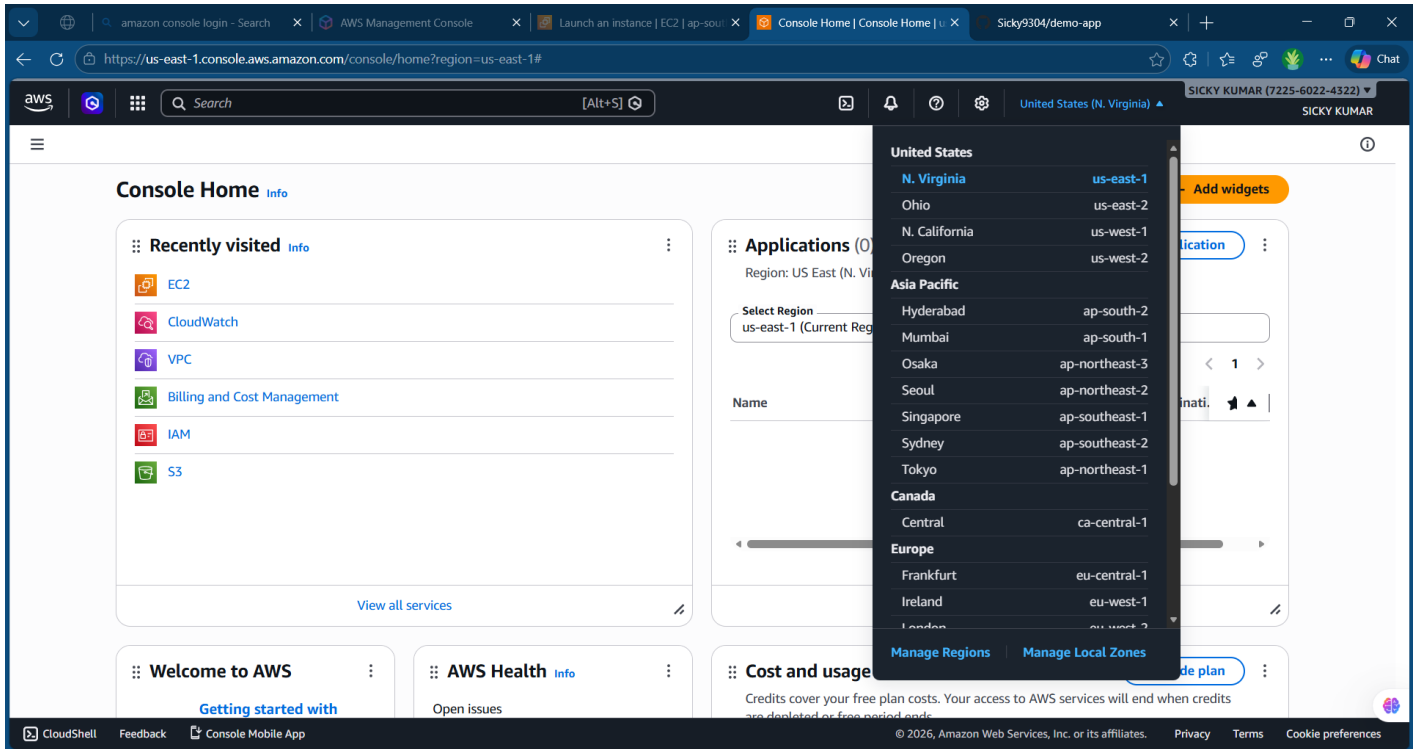

Problem Statement: Create a WorkMail for your Organization. **Solution:**

Step 1: AWS Account Login

Open web browser → Go to <https://aws.amazon.com> → Login / Sign up to AWS account.

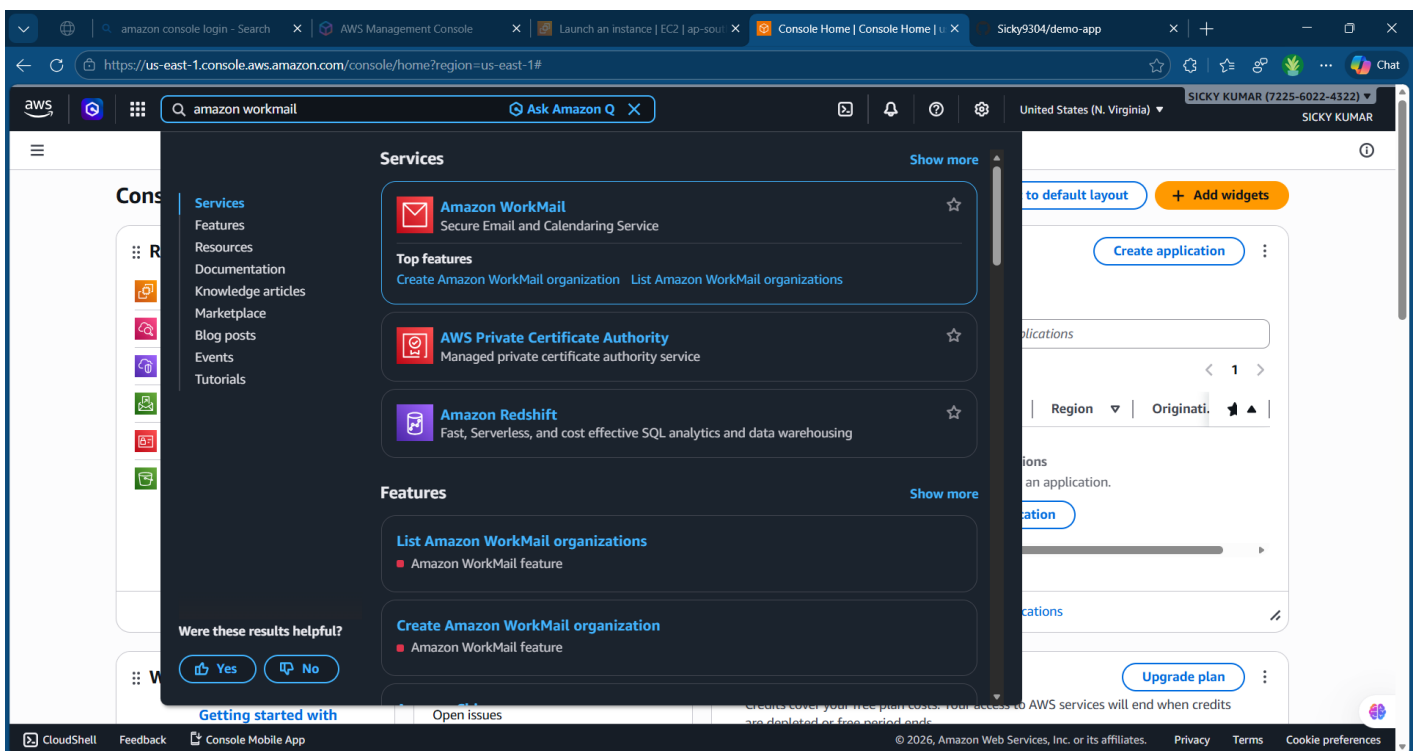

Step 2: Change AWS Region

AWS Console Homepage → Top right corner **Region Dropdown** → Select **N. Virginia (us-east-1)** region.

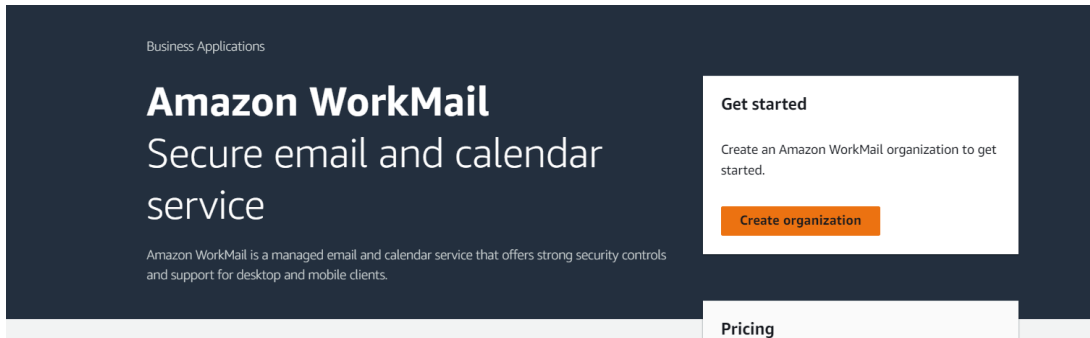

Step 3: Open AWS WorkMail Service

AWS Management Console → Search **WorkMail** in the search bar → Click **Amazon WorkMail**.

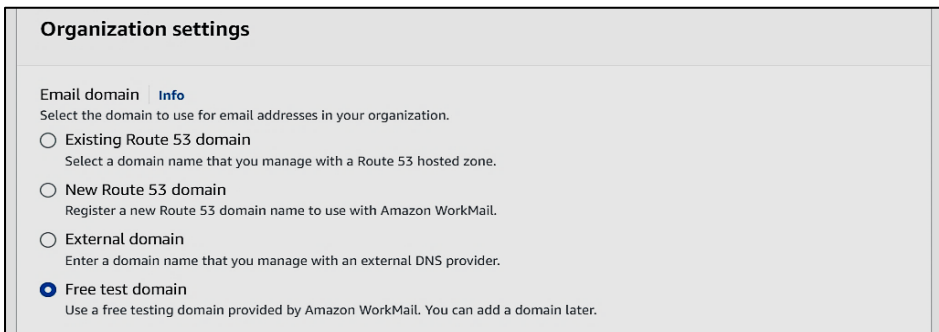

Step 4: Create WorkMail Organization

Amazon WorkMail Dashboard → Click **Create Organization**.

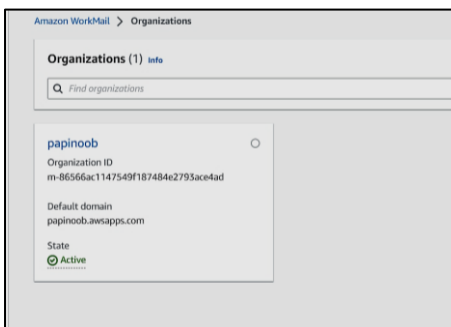

Step 5: Select Domain Type

Organization setup page → Select Free test domain option under Email Domain

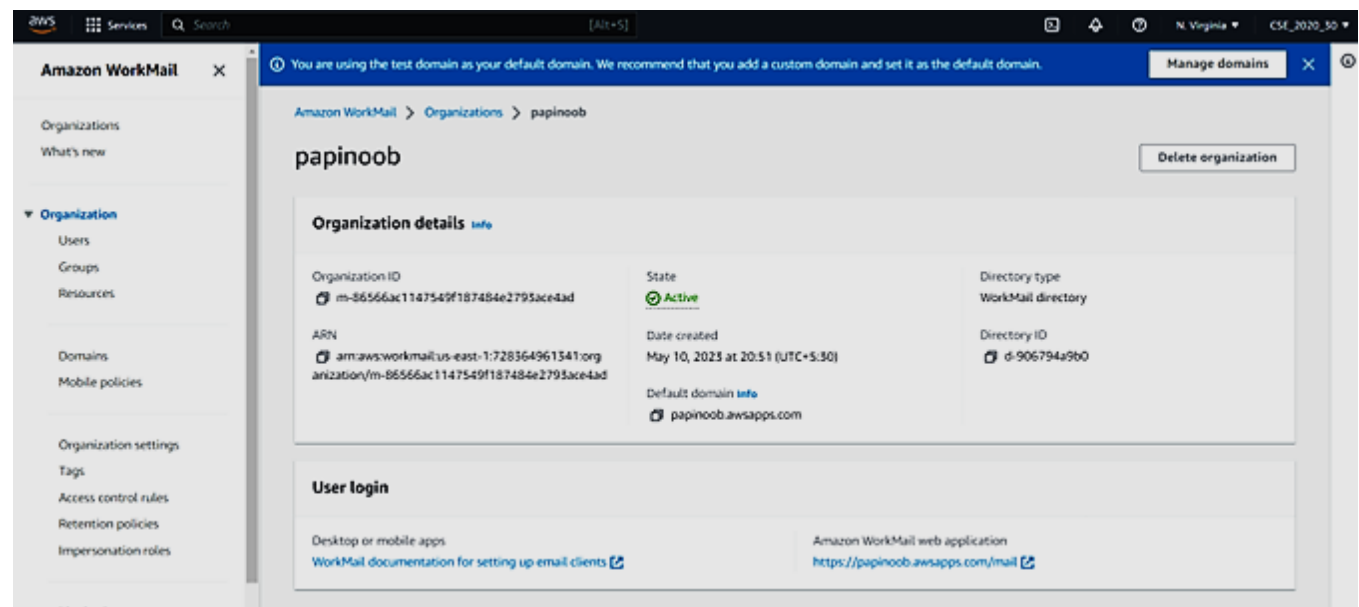

Step 6: Configure Organization Details

Enter **Organization Name / Alias** (eg. papinoob) → Click **Create Organization**.

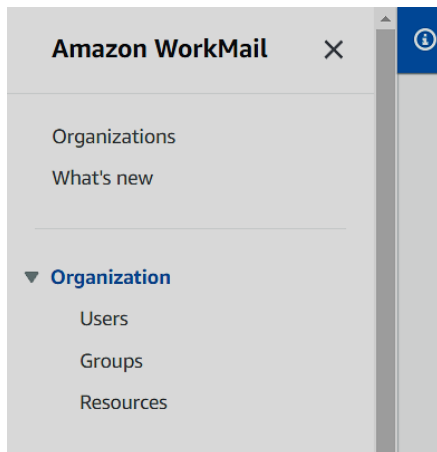

Step 7: Wait for Organization Creation

Wait approximately 2 minutes until the organization status becomes Active → Click on the Organization Name.

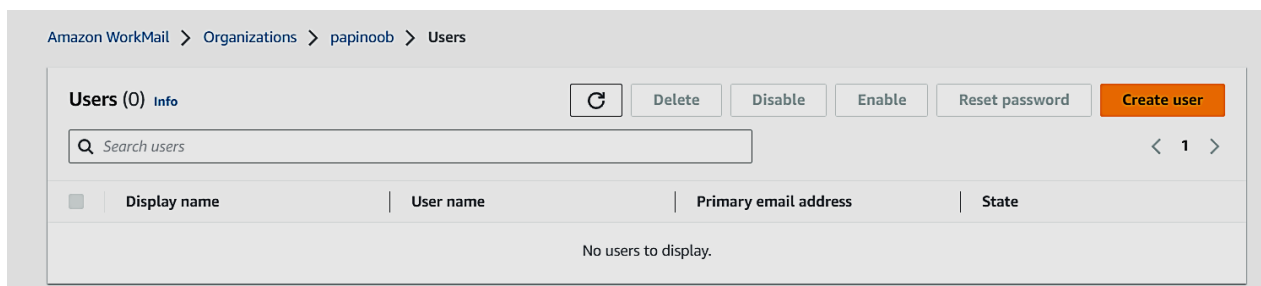

Step 8: Open Users Section

Organization Dashboard → Left navigation panel → Click **Users**.

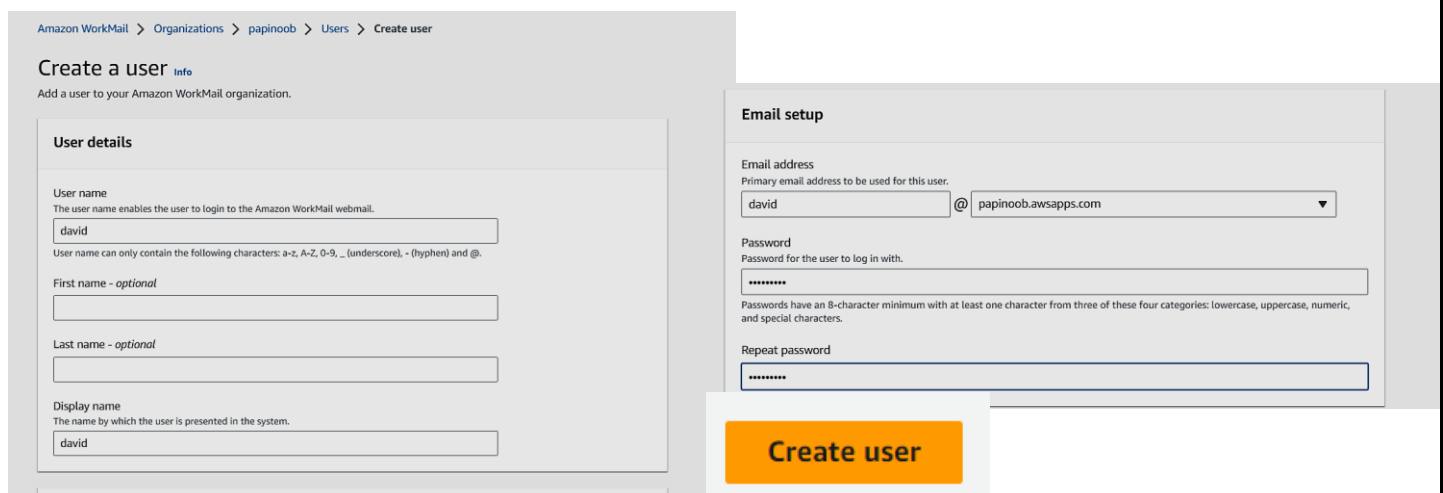

Step 9: Create New User

Users section → Click Create User → Enter the following details: Username → Display Name → Password → Click Create User

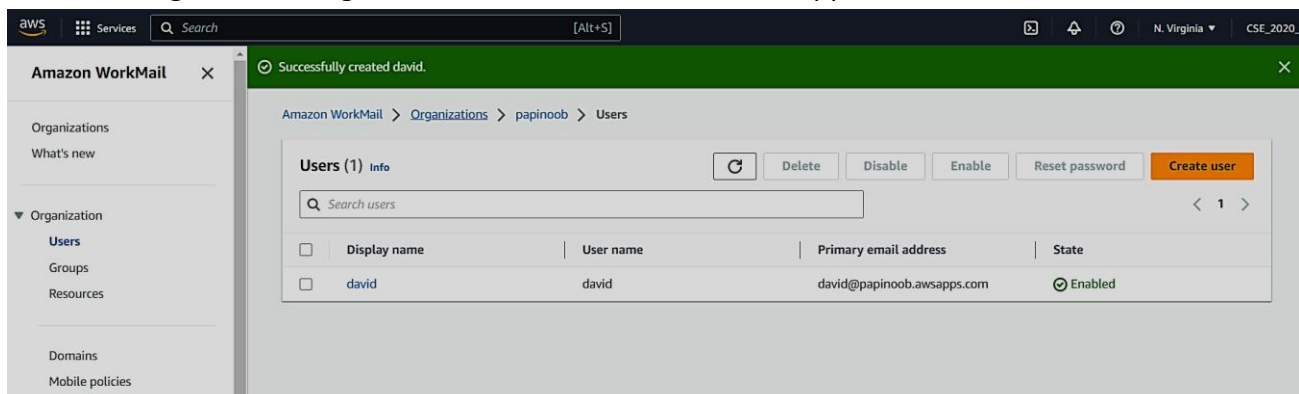

Give username(**david**). Then give a **display name**. Then provide the **password**

Step 10: Open WorkMail Web Application

Return to Organization Page → Click Amazon WorkMail Web Application link.

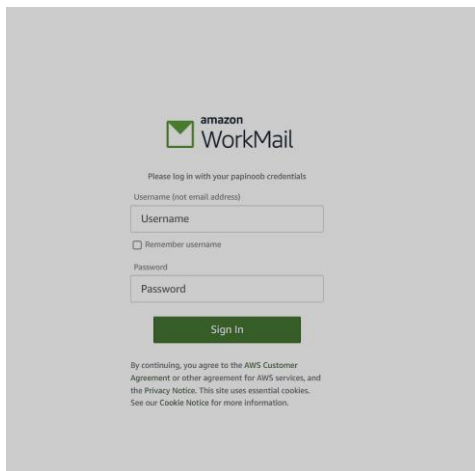

Step 11: Now click on the Amazon Workmail web application link.

Organization details Info		
Organization ID m-86566ac1147549f187484e2793ace4ad	State Active	Directory type WorkMail directory
ARN arn:aws:workmail:us-east-1:728364961341:organization/m-86566ac1147549f187484e2793ace4ad	Date created May 10, 2023 at 20:51 (UTC+5:30)	Directory ID d-906794a9b0
	Default domain Info papinoob.awsapps.com	

User login	
Desktop or mobile apps WorkMail documentation for setting up email clients	Amazon WorkMail web application https://papinoob.awsapps.com/mail

Step 11: Login to WorkMail

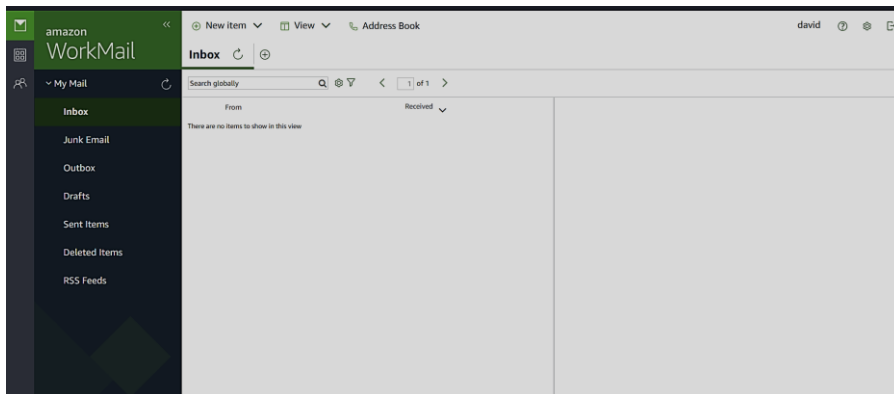

WorkMail login page → Enter Username and Password created earlier → Click Sign In

The image shows the Amazon WorkMail login page. At the top is the Amazon WorkMail logo. Below it, a message says "Please log in with your papinoob credentials". There are two input fields: "Username (not email address)" and "Password". Below the password field is a "Sign In" button. At the bottom, there is a small disclaimer: "By continuing, you agree to the AWS Customer Agreement or other agreement for AWS services, and the Privacy Notice. This site uses essential cookies. See our Cookie Notice for more information."

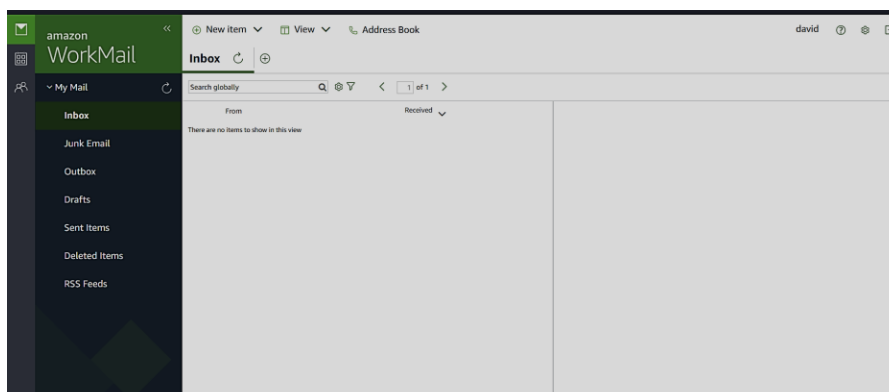

Step 12: Verify Mailbox Access

After login → WorkMail inbox will open for the created user.

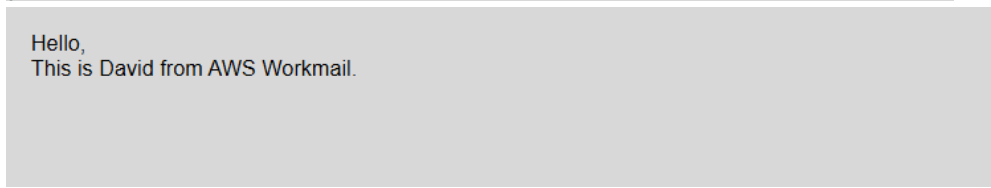

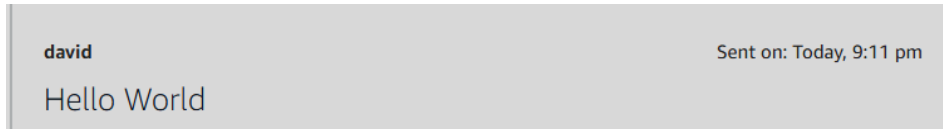

Step 13: Send Test Email

WorkMail interface → Click New Email / New Item → Enter your Gmail address → Write a message → Click Send.

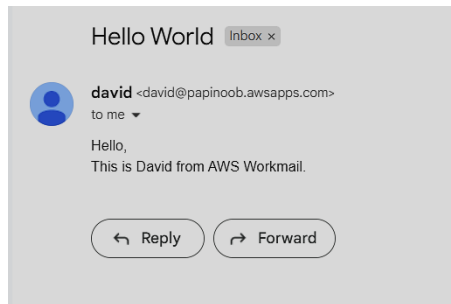

Select **new email**. Now write an **email** to your **Gmail address**.

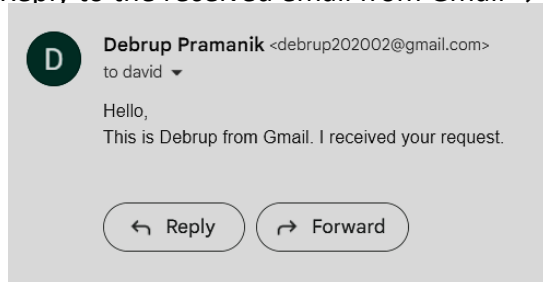

Step 14: Check Gmail Inbox

Open Gmail → Verify that the email from **AWS WorkMail account** has been received

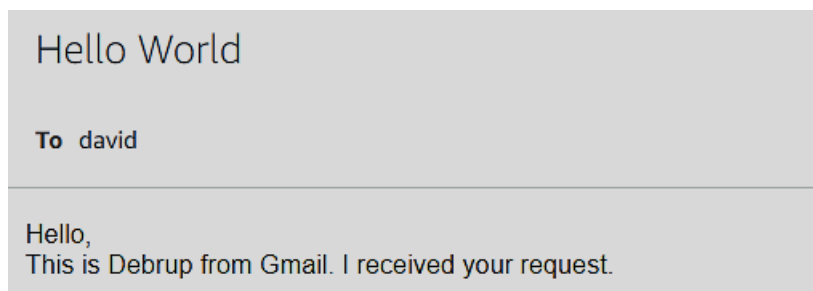

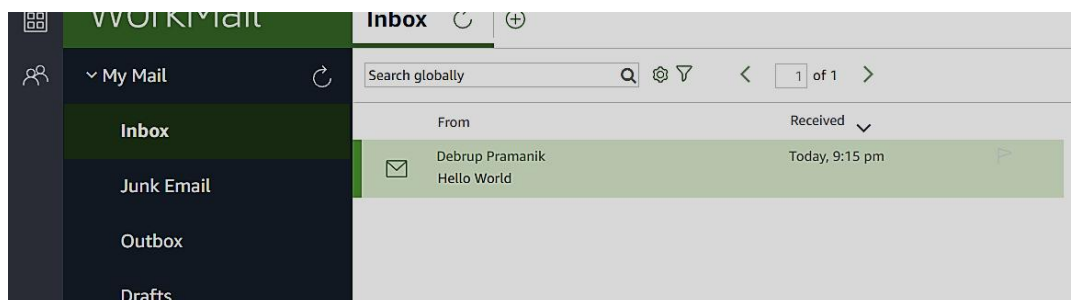

Step 15: Reply to WorkMail

Reply to the received email from Gmail → Send the reply.

Step 16: Verify WorkMail Inbox

Return to WorkMail Inbox → Confirm that the reply email is received successfully.

We have successfully received a mail.
Hence our mail is working perfectly fine.
We have successfully created a workmail for our profile.
