SDITO LAB ASSIGNMENTS

ASSIGNMENT: 15

Create a serverless computing service.

SOLUTION:

Step 1: Search lambda in the search bar and then click on create function.

Step 2: Give function name and keep other details unchanged.

Step 3: Scroll down to the Code option to edit the code and deploy it.

Step 4: Click the Test under Deploy > Create new test event > name the event and save it. Go to Test option.

After testing, a successful notification will pop up in the Test option.

Go to configuration > Function URL and click on Create URL.

Click on none and save the URL. Now copy the function URL and paste it in a new tab.

Step 5: Again go to code and edit the it and deploy it afterwards. Now refresh the URL.
